Hello, I'm Marina Iovenko, an Interior Designer with over 10 years of experience in the field. My expertise lies in designing interior spaces tailored for various purposes, ranging from residential to commercial projects. Over the years, I have accumulated a portfolio rich with diverse and successfully realized projects.

At the heart of my design process is the use of 3D visualization techniques, primarily through 3ds Max, which allows me to bring concepts to life with stunning accuracy and detail. This website showcases a selection of these visualizations, offering a glimpse into the depth and quality of my work.

In addition to visualizations, I also create detailed project blueprints and construction drawings, ensuring that every aspect of the design is meticulously planned and executable. The culmination of my work is the complete design project — a harmonious blend of aesthetics, functionality, and client vision.

MONOCHROM FLAT

A project of small apartments on the 15th floor.
They are decorated in minimalism and monochrome.
I used natural materials and colors, interesting shapes of lamps and decorative elements.

RESTAURANT

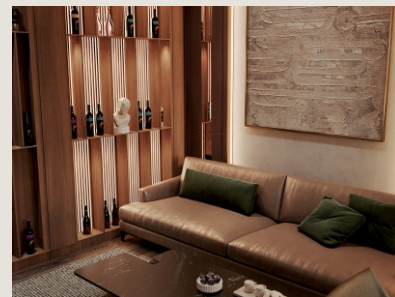

A project of renovation of a restaurant. The restaurant's interior was created several years ago and had become morally and physically outdated. The owner wanted to make the space fresher, more modern, and open, adding more light and natural materials. New interior of the base hall.

A separate banquet hall with a more intimate atmosphere.

CATALOG

Completed for a startup manufacturer of wooden tables in Spain. To start sales, the customer developed a line of 20 tables. My task was to build a table in the 3D max program, make several types of tables on a light white background (studio) and come up with and develop a unique interior for each model, and make several types of tables in the interior.

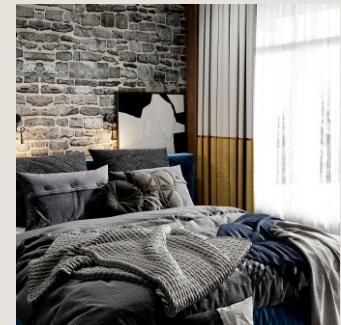

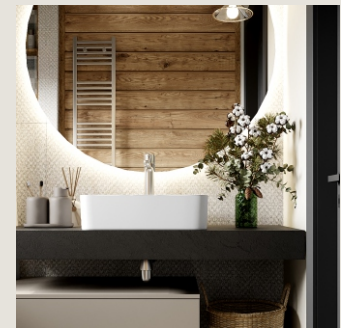

CHALET

Interior design project for a wooden house in the mountains.
Snow, mountains, Christmas.

The task was to make the interior cozy, rustic and modern loft at the same time. Using wood, concrete and modern art.

APARTMENT

This apartment was bought as an investment, the owner wanted to sell or rent it out after renovation. I was able to take photos of this project, below are shown both 3D visualizations of the project and the results of construction work and decoration of the finished interior.

GYM CHANGING ROOMS

I worked in a design team on a large volume of public areas of the Radisson Hotel. My area was the locker room block of the gym, massage rooms and the lobby of this block.

DOORS CATALOG

Visualizations for the catalog of a door manufacturer from Spain. The client chose several door leaf options, my task was to show this leaf in different combinations of openings and openings.

FRENCH STYLE APARTMENT

A creative project without specific technical requirements, inspired by Paris.

HALLS

I worked on the project in a team. My work area is the halls in the spa area.
Atmospheric rooms that correspond to the mood of relaxation and meditation.
I added a few notes of the oriental interior to the main noble style of the hotel interiors.
